

SepTiC Randomisation Flow Chart

Trial 3: GM-CSF

01

Login to OpenClinica

If the participant is already enrolled in Trials 1 and 2, SKIP to step 5 and select the correct Trial ID.

If the participant is not already enrolled in the study, click Add a new participant

02

Add the following 'Visits':

1. Screening Diagnostic and Fluid (This visit covers screening for the whole study)

04

Randomisation 3 (GM-CSF) Visit

Add the Randomisation 3 (GM-CSF) Visit

03

Screening Diagnostic and Fluid Visit

Complete all 3 forms in the visit:
Date of Visit
Eligibility (Diagnostic and Fluid)
Pre randomisation data

05

Randomisation Confirmation

Add the Randomisation 3 (GM-CSF) Visit
Complete the randomisation confirmation page FIRST

06

Randomisation Assignment

The allocation will be the kit number the participant is assigned to.

Troubleshooting

- If the allocation is '**Treatment**', please wait a few minutes and then re-open the randomisation assignment in **edit** mode as it may not have synced properly. 'Treatment' is not a valid randomisation allocation.

If the allocation is **BLANK**, please ensure all screening and eligibility forms have been entered and marked as complete.

- Once you finish the randomisation confirmation, it is best to wait a few minutes before opening the randomisation assignment form in edit mode (this will give the database time to sync to give the correct allocation).
- Detailed guidance can be found in the **SepTiC eCRF completion guide** on the SepTiC website
