Southampton General Hospital	1
Warrington Hospital	1
John Radcliffe Hospital	1
Calderdale Royal Hospital	1
Royal Glamorgan Hospital	1

Milestone Reached: 900 Patients Recruited!

We are thrilled to announce that the SEPTIC study has officially crossed the 900-patient milestone! This is an incredible achievement, and we want to send a huge thank you to all participating sites and clinical teams. Your ongoing dedication, hard work, and persistence make this study possible - we couldn't have reached this point without you!

Top Recruiter Spotlight: Charing Cross Hospital

A special shout-out to the team at **Charing Cross Hospital**, who have officially recruited their **100th patient**!

Top recruiting sites in September

St George's Hospital recruited 8 participants this month!

Well done to Charing Cross Hospital who recruited 7 participants and Bristol Royal Infirmary who recruited 6 participants in September

New sites opening to SepTiC this month

We would like to welcome Morriston Hospital and Princess Alexandra Hospital to the SepTiC Study, wishing you all the best with recruitment to the study

Please make sure to file all documents in your paper ISF/ Florence eISF. See the SepTiC website for most updated documents

SepTiC: Important Action Items & Reminders

10ml EDTA Tube Replacements

Our current stock of 10ml EDTA tubes expires on 31st of October 2026.
Please check your local site inventory as soon as possible and let us know how many replacement tubes your team will require.

Timely Data Entry

In accordance with Good Clinical Practice guidelines, please ensure that all patient data entry is completed within 2 weeks of the study visit or procedure. Timely data entry is essential for maintaining data quality and patient safety monitoring.

Completion of End of Study (EOS) Forms

Please ensure that site staff complete the End of Study form on OpenClinica as soon as a patient has finished their Day 365 follow-up. Keeping these updated allows us to keep trial completion metrics accurate.

Upcoming webinar

We have a webinar scheduled for the 7th of October and would urge all site staff to attend with any questions for the investigators or trial team. The webinar will be held on Zoom from 2-3pm. This webinar will be recorded so if you're unable to attend you will be able to view the recording on our Youtube channel.

Link to zoom webinar:

Meeting ID: 938 1776 7036
Passcode: 1LmN^L

Fluid Intervention FAQ

Q: What is included in the fluid input and output calculations?
A: Total input includes: Total volume input on that day including IV and enteral intake, nutrition, drug volumes and transfusions.
Total Fluid output includes: Total volume output including urine, RRT, and drain outputs

If the patient has been discharged to the ward and the fluid information is missing/ not accurate then please select 'Data unavailable'. Please do not enter '0' as this will appear that no fluid was given.
